Lecturer DAVID DOCHERTY (education) lands safely after demonstrating a somersault. 69-70: Vol. V, no. 9.

## Campus Events

The department of psychology is planning a one-day open house during the relatively quiet days of Reading Week from February 23 through 27, when students will be left to their own devices. Faculty will demonstrate their experimental work and be available for informal discussion. Final plans, including a firm date, are now being set.

Next month will see another opening-up, with a biology club teach-in on "Environment Tomorrow". Plans for March 7 are designed to involve the whole community in discussion of some of today's most pressing topics: pollution, the population explosion, and the use of natural resources. Lab instructor BETSY SWEENEY, chairman of the teach-in committee, reports that the day's schedule will include panel sessions, films, and an evening banquet.

One of North America's most controversial and cosmically minded scientists is expected to visit the University early in March. He is Dr. Immanuel Velikovsky, whose Worlds in Collision put forward theories that space research took almost 20 years to verify. Associates during his long career included Sigmund Freud and Albert Einstein.

MRS. PHYLLIS FLAVELLE (alumni office) reminds readers that the annual Alumni Beer and Barbecue is approaching. The bash will be held at the SUB this year on the evening of March 21, in honour of the 1970 graduating class. Dress is casual and tickets are \$2.50. Invitations will be going out in two weeks.

## Faculty/Staff News

DR. H.W. DOSSO and DR. H.M. SULLIVAN (physics) will visit Ottawa on February 18 and 19, to attend meetings of the associate committee of geodesy and geophysics of the National Research Council of Canada.

DR. G.A. MILTON (psychology) will attend the organizational meeting of the new Canadian Society for the Advancement of Research in Child Development, to be held at the University of Waterloo on February 20 and 21.

Presenting papers at this month's Western Regional Nuclear Conference in Saskatoon will be DR. C.E. PICCIOTTO, DR. WILLARD SPERRY, R.W. HARRISON, and MAURICE TAUTZ (physics), all of the Victoria TRIUMF group working on plans for Western Canada's new cyclotron. Representatives of all four co-operating universities held a TRIUMF board meeting here on February 2.

DR. DERRICK SEWELL (geography and economics) will attend a meeting of the National Advisory Council on Water Resources Research in Ottawa on February 19.

The new vice-president of the Society of Architectural Historians is DR. ALAN GOWANS (art history). He will organize speakers for the international organization's major meetings over the next two years in Chicago and San Francisco.

DR. ELAINE LIMBRICK (French), president of l'Association des Professeurs de Français des Universités Canadiennes, will attend an executive meeting of the association in Montreal later this month. She will then take part in the Western Canadian Modern Languages Conference in Edmonton, which will also be attended by colleague ROY PRIOR.

A workshop in developmental drama was presented this week by PROFESSOR RICHARD COURTNEY (theatre) and some of his senior students at the Northwest Drama Conference in Eugene, Oregon. Professor Courtney will give a public address at the National Arts Centre in Ottawa on March 6, followed by lectures at other centres in Eastern Canada.

## Faculty/Staff News

The guest speaker at the annual meeting of the Association for the Retarded in Ladysmith next week will be DR. OTFRIED SPREEN (psychology). His topic is "The Future of the Retarded in Our Community". Dr. Spreen will also address the Victoria Medical Research Association on clinical neuropsychology.

DAVID STEVENSON (anthropology and sociology) will draw from his experience in the Arctic in a lecture series offered by the UBC extension department. The series explores relationships between art forms and the way of life in Indian and Eskimo cultures.

Changing approaches to teacher training were described by DEAN FRED T. TYLER (education) in an address in Port Alberni earlier this month. Dean Tyler spoke to 30 student teachers from Victoria and Simon Fraser University who were in the Alberni Valley to add to their classroom experience. The students were dinner guests of the local school board.

DR. JANE A. KEEFER has joined the chemistry department as a postdoctoral fellow. She completed her doctoral research at the University of Illinois.

Penetration, a play by LAWRENCE RUSSELL (English), is one of the entries in the annual festival of the Canadian University Drama League, on stage this week at Ottawa's National Arts Centre. The production is the work of the Players' Club.

WILLIAM CROSS (education) was one of the speakers last weekend at the first Future Teachers' Conference to be held at Simon Fraser. With almost 300 students in attendance, it was the largest conference to date.
